Frauenklinik Maistraße,  
Seminarraum 1

*“I think it's often little things that are the most interesting because you take a lot of stuff for granted that you do all the time and sort of assume that everyone does it the same way but it's fascinating to see how medical school varies around the world.” (Trent Calcutt, University of Queensland)*

*“In general, I liked the program. I especially want to note the change of activity during one day. It is work in the ward in the morning, then meet-the-expert, seminars, clinical case discussions etc., extensive cultural program, excursions, traveling to other cities. This is very interesting, funny and allows to establish contact with other participants.” (Yuliia Magdebura, First Moscow State Medical University I.M. Sechenov)*

*“I learned a lot about the organization of the German healthcare system and was able to compare and contrast it with the Canadian system. I found the private-public mix most interesting, as I spent my time on a private ward and learned the interesting dynamics that come from it.” (Ryck Schielke, University of Alberta)*

*“Für mich war es spannend, einen Kurs komplett auf Englisch zu machen. Durch das Übersetzen für meinen australischen Study Buddy habe ich selbst viel reflektiert und gelernt.” (Michael Winkelmann, LMU München)*
